

AURA GEN PTY LTD

Website Specification & Build Brief

A complete written specification for the Aura Gen corporate website, prepared to be handed directly to Claude Code as a single source of truth for the build.

Document version: 1.0

Date: May 2026

Audience: Claude Code (build agent)

Reference sites: ilionanalytics.com, inteleqt.co.za, tigeranalytics.com

Contents

This document is sequenced so the website can be built top to bottom: brief and tech stack first, then design system, then site map, then page-by-page content, then build instructions.

24. Acceptance Checklist

01. Project Overview & Objectives

What we are building

A corporate marketing website for Aura Gen Pty Ltd, a South African consulting firm specialising in data science, AI, business intelligence, IT consulting, and specialist IT talent placement. The site must communicate credibility, technical depth, and South African market expertise to enterprise decision-makers in the public, private and development sectors.

Primary objectives

- Establish Aura Gen as a credible, enterprise-grade data and AI consulting partner.
- Clearly articulate the service portfolio across data, AI, BI, integration, governance, IT strategy and talent.
- Make it obvious which sectors Aura Gen serves (public, private, development).
- Generate qualified inbound enquiries through a clear contact path.
- Feel modern, intelligent and African — not generic SaaS, not stock-photo corporate.

Out of scope (for this build)

- Blog or insights publishing system (can be added later — stub the page only).
- Client login / portal.
- E-commerce or payment integration.
- Multi-language support (English only for v1).
- Case study detail pages (list them, but do not build individual pages yet).

Success metrics

- Visitor can describe what Aura Gen does within 10 seconds of landing on the home page.
- Visitor can find any service within two clicks.
- Contact form submission is possible from every page via the footer or a fixed CTA.
- Lighthouse scores: Performance ≥ 90 , Accessibility ≥ 95 , SEO ≥ 95 , Best Practices ≥ 95 .

02. Target Audience

Primary audiences

1. Public sector decision-makers

Municipal CIOs, heads of digital at state-owned enterprises, utilities and healthcare programme managers. They care about governance, compliance, service delivery and proven local experience.

2. Private sector executives

CTOs, CDOs, heads of analytics and IT directors at financial services, retail, tech and corporate organisations. They care about ROI, speed to value, scalability and technical credibility.

3. Development sector programme leads

NGO programme directors, donor agency leads, research institution heads. They care about impact, transparency, capacity building and partnership.

4. Senior IT talent

Skilled data engineers, analysts, architects and consultants who might consider joining or being placed by Aura Gen.

What they all need from the site

- Quick proof that Aura Gen is real, credible and based in South Africa.
- A clear list of services in plain language.
- Confidence that Aura Gen understands their sector.
- An easy way to start a conversation.

03. Reference Sites & Design Direction

Three reference sites guide the look and feel. Each contributes a different ingredient. Do not copy any of them directly — synthesise.

Reference 1 — ilionanalytics.com

Take from this:

- Clean, restrained, professional layout with generous whitespace.
- Serious, direct copy tone ("Serious data challenges deserve a direct conversation").
- Strong contact page treatment with offices listed and a simple form.
- Yellow / warm accent against a sober dark and white palette.
- South African office addresses and direct phone numbers shown prominently.

Do not take:

- The slightly dated Wix-template feel.
- Heavy hero photography of office buildings.

Reference 2 — inteleqt.co.za

Take from this:

- The idea of presenting BI capabilities as named, productised solutions per sector (Inteleqt does this with FuelScience, dealer analytics, brokerage analytics, etc.).
- Sector-specific framing — show that the offering changes by industry.
- South African market positioning and language.

Do not take:

- The dense, text-heavy layouts.
- The older visual style.

Reference 3 — tigeranalytics.com

Take from this:

- Bold, confident typography and large headlines.
- Card-based service navigation with imagery and short labels.
- The way services are grouped into 3–4 capability "pillars" rather than a flat list.
- The polished, enterprise-grade feel with awards, partnerships and case study cards on the home page.
- Smooth, modern motion and hover behaviour.

Do not take:

- The orange-heavy palette (we will use gold/amber instead).
- The very dense mega-menus — Aura Gen's IA is smaller.
- The global multinational tone — we are deliberately South African.

Synthesis — the Aura Gen feel

Imagine the restraint and credibility of Ilion, the sector-productisation logic of Inteleqt, and the confident typography and polish of Tiger Analytics — combined and made distinctly South African. Sophisticated. Quiet authority. Premium but not flashy. Dark backgrounds with warm gold accents to evoke the "aura" in the name.

04. Brand Identity, Voice and Tone

Brand essence

Aura Gen turns complex enterprise data into intelligent business decisions. We are a South African technology and consulting partner with executive-level expertise and operational depth.

Brand attributes

- Intelligent — we lead with substance, not slogans.
- Trustworthy — we behave like a partner, not a vendor.
- Locally grounded — we understand the South African operating context.
- Future-ready — we work with modern data, AI and cloud technologies.
- Outcomes-focused — we exist to produce measurable business impact.

Voice

- Direct. Short, declarative sentences. No filler.
- Confident but not boastful. We state capability without exaggeration.
- Plain English. Avoid jargon unless naming a specific technology.
- Calm. We do not use urgency, hype or fear-of-missing-out tactics.

Tone words to use

Empower, enable, modernise, integrate, govern, deliver, partner, unlock, build, transform.

Tone words to avoid

Revolutionary, disruptive, ninja, rockstar, world-class (overused), best-in-class, cutting-edge (overused), synergy, leverage as a verb in headlines.

Tagline options (pick one)

- Intelligent data. Measurable impact.
- Data, intelligently delivered.
- Africa's intelligent digital transformation partner.
- Where data becomes decision.

Recommended primary: **Intelligent data. Measurable impact.**

05. Visual Design System — Colors

The palette is dark-led with a warm gold accent and a cool indigo secondary. Backgrounds default to deep near-black or white depending on section; gold is reserved for emphasis and never used for body text.

Core palette

Onyx (primary background, dark sections)

#0A0E1A

Deep Navy (cards on dark, navigation surfaces)

#111827

Slate (borders and dividers on dark)

#1F2937

Accent palette

Aura Gold (primary accent — buttons, highlights, gradient ends)

#E8A33A

Gold Soft (hover states, soft highlights)

#F5C56A

Gold Deep (active and pressed states)

#B4791F

Electric Indigo (secondary accent, links, secondary CTAs)

#4F46E5

Indigo Soft (hover for indigo elements)

#818CF8

Neutrals (light sections)

Paper (primary light background)

#FFFFFF

Cream (alternate light section background)

#FAFAF7

Line (borders on light)

#E5E7EB

Line Soft (subtle backgrounds and chips)

#F3F4F6

Text colors

Ink (primary text on light)

#0F172A

Ink Secondary (paragraphs on light)

#334155

Muted (captions, labels)

#64748B

Text on dark — primary

#FFFFFF or #F8FAFC

Text on dark — secondary paragraphs

rgba(255, 255, 255, 0.75)

Text on dark — muted

rgba(255, 255, 255, 0.5)

Usage rules

- Default body text is Ink Secondary on light, white-75% on dark.
- Gold is used for buttons, key highlights, eyebrow labels and gradient accents only — never for paragraph text.
- Indigo is used for inline links and secondary buttons.
- Never place gold on cream or on light backgrounds without a darker container — gold needs a dark surface to glow.

06. Visual Design System — Typography

Typefaces (Google Fonts)

Display and headings: Space Grotesk

Weights used: 500, 600, 700. Use for h1–h4, section eyebrows where bold, and large numerical statistics.

Body: Inter

Weights used: 300, 400, 500, 600. Use for all paragraph text, navigation, buttons, captions.

Monospace: JetBrains Mono

Weights used: 400, 500. Use sparingly for technical labels, code snippets, eyebrow tags, footer meta text. Acts as a visual signal that Aura Gen is technical.

Type scale (desktop)

Display (hero h1)

Family: Space Grotesk, weight 600, 64px, line-height 1.0, letter-spacing -0.035em.

h1 (page title)

Family: Space Grotesk, weight 600, 44px, line-height 1.05, letter-spacing -0.025em.

h2 (section title)

Family: Space Grotesk, weight 600, 32px, line-height 1.15, letter-spacing -0.02em.

h3 (sub-section)

Family: Space Grotesk, weight 600, 20px, line-height 1.3.

h4 (card title)

Family: Space Grotesk, weight 600, 16px, line-height 1.4.

Lead paragraph

Family: Inter, weight 400, 18px, line-height 1.55.

Body

Family: Inter, weight 400, 16px, line-height 1.6.

Small / caption

Family: Inter, weight 400, 13px, line-height 1.5.

Eyebrow / label

Family: JetBrains Mono, weight 500, 12px, line-height 1.3, letter-spacing 0.18em, uppercase.

Button

Family: Inter, weight 500, 15px, line-height 1, letter-spacing 0.01em.

Type scale (mobile)

Scale everything down by roughly 75%. Display becomes 40px, h1 becomes 32px, h2 becomes 24px.

Body stays at 16px minimum (never go below 16px for body on mobile).

07. Visual Design System — Spacing, Radius, Shadows

Spacing scale (in pixels)

Use a 4px base. The full scale is: 4, 8, 12, 16, 24, 32, 48, 64, 96, 128.

- Inside card padding: 24–32px.
- Between cards in a grid: 24px.
- Between sections vertically: 96–128px desktop, 64–80px mobile.
- Page horizontal padding: 24px mobile, 48–64px tablet, 96–120px desktop.
- Max content width: 1280px, centred.

Border radius

- Buttons and small chips: 6px.
- Cards and inputs: 10px.
- Large feature cards and hero containers: 16px.
- Pill / status chip: 999px (full rounded).

Shadows

Card resting shadow (light backgrounds)

0 1px 2px rgba(15, 23, 42, 0.04), 0 4px 12px rgba(15, 23, 42, 0.06)

Card hover shadow

0 4px 8px rgba(15, 23, 42, 0.06), 0 16px 32px rgba(15, 23, 42, 0.10)

Button focus ring

0 0 0 3px rgba(232, 163, 58, 0.35)

Glow on dark (used sparingly behind hero)

0 0 120px rgba(232, 163, 58, 0.25)

Iconography

Use Lucide icons (lucide.dev) at 20–24px. Stroke width 1.75. Color matches the text it sits next to — gold on dark for emphasis, ink on light, muted for secondary.

08. Component Library

Buttons

Primary button (default)

- Background: Aura Gold (#E8A33A). Text: #0A0E1A. Weight 500.
- Padding: 14px vertical, 24px horizontal.
- Radius: 6px.
- Hover: background shifts to Gold Soft, slight lift (translateY -1px), shadow appears.
- Active: background shifts to Gold Deep.
- Focus: gold ring at 35% opacity.

Secondary button

- Outline: 1px solid current text color. Background transparent.
- On dark: white text, white border at 60% opacity.
- On light: ink text, ink border at 20% opacity.
- Hover: background fills at 5% opacity of the text color.

Ghost / text link

- No border, no background.
- Underline appears on hover.
- Uses an arrow icon (→) to the right that shifts 2px right on hover.

Cards

Service card

- White background, 1px border in Line color, radius 10px, padding 24px.
- Top: small icon (24px) in a 40x40 rounded-square container with a soft gold gradient background.
- Title in Space Grotesk 18px, then short body in Inter 15px.
- Bottom-right corner: small arrow icon that animates on card hover.
- Hover: border becomes Gold, shadow lifts.

Sector card

- Similar to service card but with a coloured top stripe (3px) that distinguishes the sector.
- Public sector stripe: Indigo. Private sector: Gold. Development: Teal (#0F766E).

Stat card (used in About)

- Dark Onyx background, radius 16px, padding 32px.
- Large stat number in Space Grotesk 48px, gold color.
- Label below in JetBrains Mono 12px, uppercase, muted white.

Navigation bar

- Fixed at the top, height 72px.
- Background: transparent over hero, then solidifies to white (light pages) or Onyx (dark pages) on scroll past 80px, with a subtle bottom border.
- Left: Aura Gen wordmark with a small gold dot accent before it.
- Center or right: nav links — Home, About, Services, Sectors, Contact.
- Far right: primary CTA button labelled "Start a conversation".
- On mobile: hamburger menu opens a full-screen overlay with the same links stacked.

Footer

- Background: Onyx (#0A0E1A). Text: white and muted white.
- Four columns on desktop: (1) brand + tagline + short blurb, (2) Navigate (page links), (3) Services (linked list), (4) Contact (address, phone, email, LinkedIn icon).
- Bottom strip: copyright, POPIA / privacy link, terms link.
- Single column stacked on mobile.

Form fields

- Labels above inputs, JetBrains Mono 12px uppercase, muted color.
- Input height 48px, radius 10px, 1px Line border, 14px Inter inside.
- Focus: border becomes Gold, soft shadow appears.
- Textarea: same styling, min-height 140px.
- Required fields marked with a small gold dot after the label.
- Validation errors in a muted red (#B91C1C), shown below the field.

09. Information Architecture & Site Map

Top-level pages

- Home — /
- About — /about
- Services — /services (single page with anchored sections per service)
- Sectors — /sectors (single page with anchored sections per sector)
- Contact — /contact

Optional / stub pages (link but do not build fully in v1)

- Insights — /insights (placeholder with "Coming soon")
- Careers — /careers (placeholder with brief copy and a mailto link)
- Privacy Policy — /privacy
- Terms — /terms

Navigation order (left to right)

Home, About, Services, Sectors, Contact. Insights and Careers live in the footer only for v1.

Anchor sections for the Services page

- #data-intelligence
- #artificial-intelligence
- #business-intelligence
- #enterprise-integration
- #data-warehousing
- #data-governance
- #whatsapp-automation
- #it-consulting
- #talent-solutions

Anchor sections for the Sectors page

- #public-sector
- #private-sector
- #development-sector

10. Home Page Spec

The home page is dark-led, with alternating dark and light sections to create rhythm. Build it as a single scrolling page.

Section H1 — Hero (dark)

Background

Onyx (#0A0E1A) with two subtle radial glows — gold at bottom-left, indigo at top-right — to evoke an aura.

Eyebrow (above headline)

INTELLIGENT DIGITAL TRANSFORMATION · SOUTH AFRICA

Headline (h1, Display size)

Intelligent data, made visible.

Sub-headline

Aura Gen helps organisations across South Africa turn complex data into smarter decisions, faster operations, and measurable business impact — through data engineering, AI, business intelligence, and specialist IT talent.

Primary CTA button

Start a conversation → (links to /contact)

Secondary CTA button (outline)

Explore services → (links to /services)

Below CTAs — trust strip

A single-line row of muted text reading: "Trusted across municipalities, financial services, retail, healthcare and development organisations in South Africa."

Section H2 — What we do (light)

Eyebrow

WHAT WE DO

Heading

From fragmented data to confident decisions.

Body paragraph

We are a South African technology and consulting partner specialising in data intelligence, artificial intelligence, business intelligence, enterprise integration and digital transformation. We work with our clients to modernise operations, unlock hidden insights, improve governance, and drive measurable business outcomes through technology.

Below: a 3-column grid of capability pillars (the four "What We Do" pillars)

Each card has an icon, a title, a one-line description and a small "Learn more →" link to the anchor on /services.

Pillar 1 — Data & Intelligence

Transforming fragmented data into actionable insights that support strategic and operational decision-making.

Pillar 2 — Artificial Intelligence

Building intelligent solutions that automate processes, improve efficiency and unlock predictive capabilities.

Pillar 3 — Business Intelligence & Reporting

Interactive dashboards, reporting platforms and executive insights that drive performance visibility.

Pillar 4 — Strategic IT & Talent

IT strategy, enterprise architecture, governance, and specialist IT talent placement across data, cloud, software and agile delivery.

Section H3 — Sectors we operate in (dark)

Eyebrow

SECTORS

Heading

Built for South Africa's operating realities.

Body

Our work spans the public, private and development sectors. We bring an understanding of the regulatory, operational and budgetary realities of each.

Below: 3 sector cards in a horizontal row

Public Sector — Municipalities, state-owned enterprises, utilities, healthcare. Built for governance, compliance and service delivery.

Private Sector — Financial services, technology, retail and corporate organisations. Built for ROI, scalability and speed to value.

Development Sector — NGOs, donor agencies, academic and research institutions, public-private innovation projects. Built for impact and accountability.

Section H4 — Our promise (light, two-column)

Left column

Eyebrow: OUR PROMISE

Heading: We do not simply deliver technology.

Body: We deliver outcomes. Better decisions, operational visibility, integrated intelligence, improved service delivery, future-ready digital ecosystems, and measurable business impact. Your success becomes our benchmark.

Right column — vertical list of seven outcomes (each with a small gold dash bullet)

- Better decision-making
- Operational visibility
- Integrated business intelligence
- Improved service delivery
- Future-ready digital ecosystems
- Trusted technical expertise
- Measurable business outcomes

Section H5 — Why organisations choose Aura Gen (dark)

Heading

Why organisations choose Aura Gen.

Below: a 2 by 4 grid of short reasons

- Deep expertise in enterprise data ecosystems.
- Strong understanding of South African public and private sector environments.
- Strategic and operational technology alignment.
- Scalable and future-ready solutions.
- Agile delivery methodologies.
- Client-focused partnerships.
- Executive-level consulting approach.
- Skilled multidisciplinary technology specialists.

Section H6 — Closing CTA banner (dark with strong gold accent)

Heading

Let's turn your data into a decision.

Sub

Tell us what you are trying to solve. We will respond within one business day.

CTA button

Start a conversation →

11. About Page Spec

Single scrolling page. Tells the Aura Gen story in five sections.

Section A1 — Page hero (light)

Eyebrow

ABOUT AURA GEN

Heading (h1)

We help organisations transform complex data into intelligent business decisions.

Lead paragraph

Aura Gen Pty Ltd is a South African technology and consulting company specialising in data intelligence, artificial intelligence, business intelligence, enterprise integration and digital transformation. From municipalities and state-owned entities to enterprise and private-sector organisations, we partner with our clients to modernise operations, unlock hidden insights, improve governance and drive measurable business impact through technology.

Section A2 — Mission and Vision (dark, two-column)

Left card — Mission

Heading: Mission

Body: To empower organisations through intelligent technology solutions, data-driven decision-making and world-class IT expertise that improve operational performance, governance, efficiency and long-term business growth.

Right card — Vision

Heading: Vision

Body: To become Africa's trusted leader in intelligent digital transformation, helping organisations harness the full power of data, AI and enterprise technology to shape smarter, more sustainable futures.

Section A3 — Our approach (light)

Heading

Strategic thinking. Technical excellence. Industry expertise.

Body

Our approach combines strategic thinking, technical excellence and industry expertise to deliver scalable, future-ready solutions tailored to each client's unique operational environment. We work as an extension of our clients' leadership — bringing executive-level consulting, multidisciplinary specialists and an outcomes-focused delivery model.

Section A4 — Core values (light, 3x2 grid of cards)

Each card: short title in Space Grotesk, then 1–2 lines of body. No icons necessary, but small gold numerals (01, 02, 03 ...) as eyebrows look clean.

01 — Innovation with Purpose

We build practical, intelligent solutions that solve real business challenges.

02 — Client-Centric Excellence

Every solution is designed around the operational goals, challenges and growth objectives of our clients.

03 — Integrity & Trust

Strong partnerships are built on transparency, accountability and professionalism.

04 — Agility & Adaptability

Technology evolves rapidly — and so do we. We stay flexible, responsive and future-focused.

05 — Empowerment Through Data

We help organisations transform raw information into strategic advantage.

06 — Sustainable Impact

We strive to create technology solutions that deliver lasting value for businesses, communities and industries.

Section A5 — Closing CTA (dark)

Heading

Partner with a team that treats your success as the benchmark.

CTA

Start a conversation →

12. Services Page Spec

Single page with a hero, then a vertical sequence of nine service sections. Each service section has its own anchor ID for direct linking from the navigation and from the home page cards.

Page hero (light)

Eyebrow

SERVICES

Heading

Nine capabilities. One outcomes-focused team.

Lead

From data foundations to AI to specialist IT talent — we cover the full lifecycle of intelligent digital transformation. Each engagement is shaped around the operational reality of the organisation we are partnering with.

Below the hero — sticky anchor strip

A horizontal strip of nine small text links (one per service) that scrolls horizontally on mobile and stays sticky just below the navigation as the user scrolls.

Section S1 — #data-intelligence — Data Intelligence & Analytics

Heading: Data Intelligence & Analytics

Lead: Transforming fragmented data into actionable insights that support strategic and operational decision-making.

Body: We design and deliver analytics environments that bring data from across the organisation into one place, structure it for analysis, and produce the insights that leadership teams need to act with confidence. We work across descriptive, diagnostic, predictive and prescriptive analytics.

Section S2 — #artificial-intelligence — Artificial Intelligence

Heading: Artificial Intelligence

Lead: Intelligent solutions that automate processes, improve efficiency and unlock predictive capabilities.

Body: From machine learning models to generative AI applications, we help organisations identify the highest-value AI opportunities, build proofs of concept, and scale them into production. Our focus is on AI that creates measurable business value — not technology for its own sake.

Section S3 — #business-intelligence — Business Intelligence & Reporting

Heading: Business Intelligence & Reporting

Lead: Interactive dashboards, reporting platforms and executive insights that drive performance visibility.

Body: We build BI environments on the platforms that fit your stack — Power BI, Tableau, Qlik and others — and design dashboards that executives, operational teams and front-line staff actually use. Every report is built around a decision someone needs to make.

Section S4 — #enterprise-integration — Enterprise Integration & Data Management

Heading: Enterprise Integration & Data Management

Lead: Connecting systems, platforms and data sources into unified ecosystems for improved operational flow.

Body: Most organisations do not have a data problem — they have an integration problem. We connect the systems and sources that produce your data, manage the flow between them, and give your teams a single operational view.

Section S5 — #data-warehousing — Data Warehousing & ETL

Heading: Data Warehousing & ETL

Lead: Scalable data environments that centralise and optimise enterprise information.

Body: We design and build modern data warehouses and lakehouses on cloud and hybrid platforms. We move data reliably from operational systems into the warehouse, structure it for analysis, and operate the pipelines that keep it fresh.

Section S6 — #data-governance — Data Governance, Protection & Compliance

Heading: Data Governance, Protection & Compliance

Lead: Frameworks that improve data quality, security, compliance and governance maturity.

Body: We help organisations establish governance frameworks that work in practice — defining ownership, quality standards, security controls and compliance posture (including POPIA), and embedding them into the way data is produced and used every day.

Section S7 — #whatsapp-automation — WhatsApp & Digital Automation Solutions

Heading: WhatsApp & Digital Automation Solutions

Lead: Intelligent customer engagement and service automation through conversational technologies.

Body: WhatsApp is the dominant communication channel in South Africa. We build intelligent WhatsApp and digital automation solutions — from customer service bots to operational workflows — that meet your customers where they already are.

Section S8 — #it-consulting — Strategic IT Consulting

Heading: Strategic IT Consulting

Lead: IT strategy, enterprise architecture, governance, cloud transformation and project delivery.

Body: We provide executive-level IT consulting to help organisations align their technology direction with their business strategy — from cloud transformation roadmaps to enterprise architecture, governance and complex project delivery.

Section S9 — #talent-solutions — Specialist IT Talent Solutions

Heading: Specialist IT Talent Solutions

Lead: Connecting organisations with highly skilled IT professionals across data, architecture, cloud, software engineering, governance and agile delivery.

Body: Through our talent network, we place specialist IT professionals into client environments on permanent, contract and project-based engagements — from senior data engineers and solution architects to agile delivery leads.

Closing CTA at the bottom of the Services page

Heading: Not sure which capability you need?

Sub: Tell us what you are trying to solve and we will help you scope the right starting point.

CTA: Start a conversation →

13. Sectors Page Spec

Single page with three sector sections. Each sector lists the specific organisation types we serve.

Page hero (light)

Eyebrow

SECTORS

Heading

Built for the operational realities of South Africa.

Lead

We work across the public, private and development sectors. We bring an understanding of the regulatory, operational and budgetary realities of each — and adapt our approach accordingly.

Section X1 — #public-sector — Public Sector

Heading

Public Sector

Lead

Modernising operations, governance and service delivery for South Africa's public institutions.

Body

We help public sector organisations modernise their data foundations, improve governance and reporting, and use technology to deliver better outcomes for citizens. Our work meets the procurement, compliance and accountability standards that the sector requires.

Who we serve (chip list)

- Municipalities
- State-owned enterprises
- Utilities
- Healthcare

Section X2 — #private-sector — Private Sector

Heading

Private Sector

Lead

Helping enterprises and corporates move from data to decisions, faster.

Body

We partner with private sector organisations to unlock the value in their data, modernise their analytics and AI capabilities, and deliver measurable business impact — whether that is revenue growth, cost reduction, customer insight or operational efficiency.

Who we serve

- Financial services

- Technology and digital companies
- Retail and commerce
- Corporates

Section X3 — #development-sector — Development Sector

Heading

Development Sector

Lead

Technology that creates measurable impact for development organisations and the communities they serve.

Body

We support NGOs, donor agencies, research institutions and public-private innovation projects with data and technology capabilities that improve programme design, reporting, accountability and impact measurement.

Who we serve

- NGOs and donor agencies
- Academic and research institutions
- Public-private innovation projects

Closing CTA

Heading: Working in a sector we have not listed?

Sub: We have likely worked with something adjacent. Let's talk.

CTA: Start a conversation →

14. Contact Page Spec

Two-column layout on desktop. Left: form. Right: contact details. Stacks to single column on mobile (form first).

Page hero (light, compact)

Eyebrow

CONTACT

Heading

Start a conversation.

Lead

Tell us what you are trying to solve. We respond to all enquiries within one business day. For urgent matters, call us directly.

Left column — contact form

Fields, in this order:

- First name (required)
- Last name (required)
- Work email (required, validated)
- Phone (optional)
- Organisation (required)
- Sector — single-select dropdown: Public Sector, Private Sector, Development Sector, Other
- Area of interest — single-select dropdown listing the nine services from page 12, plus "Talent placement" and "Not sure yet".
- Message — textarea (required, min 20 chars)
- Consent checkbox (required): "I agree that Aura Gen Pty Ltd may use these details to respond to my enquiry, in line with POPIA."
- Newsletter opt-in checkbox (optional): "Send me occasional Aura Gen insights."

Submit button

Label: Send enquiry →. Primary gold button.

Submission behaviour

Form posts to a placeholder endpoint at `/api/contact`. On success show an inline success state (replace the form with a confirmation message and a small green check icon). On error show an inline error message and keep the form values.

Right column — contact details

Block 1 — Office

Office

Johannesburg, South Africa

(Full street address to be supplied — leave as a placeholder TBC for now.)

Block 2 — Direct lines

General enquiries: +27 (placeholder)

Email: hello@auragen.co.za

Block 3 — Connect

LinkedIn (icon link, placeholder URL)

Block 4 — Response time

We respond to all enquiries within one business day.

15. Footer, Navigation & Global Elements

Top navigation

Order: Home · About · Services · Sectors · Contact. Primary CTA on the right: "Start a conversation". On scroll past 80px the bar gains a solid background and a subtle bottom border.

Footer (Onyx background)

Column 1 — Brand

Aura Gen wordmark with the gold dot accent. Tagline below: "Intelligent data. Measurable impact." Short paragraph below: "A South African technology and consulting partner. We help organisations turn data into smarter decisions, faster operations and measurable business impact."

Column 2 — Navigate

Links: Home, About, Services, Sectors, Insights (coming soon), Careers, Contact.

Column 3 — Services

All nine services, each linking to its anchor on the Services page.

Column 4 — Contact

Office address (placeholder), email, phone, LinkedIn icon.

Bottom strip

Left: © 2026 Aura Gen Pty Ltd. All rights reserved. Right: Privacy Policy · Terms · POPIA.

Cookie banner

Slim banner at the bottom on first visit. One line: "We use cookies to make Aura Gen work and to understand how the site is used. See our Privacy Policy." Two buttons: "Accept" (primary gold) and "Reject" (ghost). Once dismissed, do not show again for 180 days. Store the choice in localStorage.

16. Motion & Interaction

Principles

- Quiet motion. Nothing bounces. Nothing spins.
- Most animations are 200–300ms with an ease-out curve.
- Respect prefers-reduced-motion — disable all non-essential animation when it is set.

Specific behaviours

- On scroll: fade-and-rise for section content (translateY 16px → 0, opacity 0 → 1, duration 400ms, triggered when 20% visible).
- Card hover: shadow lifts, border colour shifts to gold, arrow icon translates 4px right.
- Button hover: subtle background colour change and 1px lift.
- Nav bar: background solidifies smoothly as the user scrolls past 80px.
- Hero radial glows: very slow, almost imperceptible drift (use a 20-second loop with low-amplitude transform).
- Anchor link clicks: smooth scroll with a 100ms ease-in-out.

17. Responsive Behaviour

Breakpoints

- Mobile: 0–639px
- Tablet: 640–1023px
- Desktop: 1024–1439px
- Wide: 1440px and above

Layout rules

- All multi-column grids collapse to a single column on mobile.
- Two-column layouts (e.g. Mission and Vision) become stacked on tablet and mobile.
- Navigation collapses to a hamburger that opens a full-screen overlay below 1024px.
- Horizontal anchor strips on the Services page become horizontally scrollable rows on mobile.
- Page horizontal padding: 24px mobile, 48px tablet, 96px desktop, 120px wide.
- Hero headline scales: Display 64px → 40px on mobile.
- Section vertical padding: 128px desktop → 80px tablet → 64px mobile.

18. Technical Stack

Recommended stack

- Framework: Next.js 14+ with the App Router.
- Language: TypeScript (strict mode on).
- Styling: Tailwind CSS, with the design tokens from sections 05–07 mapped into `tailwind.config.ts`.
- Components: shadcn/ui as the base, customised to the Aura Gen visual language.
- Icons: lucide-react.
- Fonts: Google Fonts via `next/font` (Space Grotesk, Inter, JetBrains Mono).
- Animation: Framer Motion for scroll-in transitions; restrained use.
- Forms: react-hook-form with zod for validation.
- Email / submission backend: placeholder API route at `/api/contact` — implementation can be wired to Resend or a similar service later.
- Deployment: Vercel (recommended) or Netlify.
- Analytics: Plausible (privacy-friendly) — instrument once deployed.

Tailwind config — required token additions

```
colors.onyx = '#0A0E1A'
colors.navy = '#111827'
colors.slate-deep = '#1F2937'
colors.gold.DEFAULT = '#E8A33A'
colors.gold.soft = '#F5C56A'
colors.gold.deep = '#B4791F'
colors.indigo.DEFAULT = '#4F46E5'
colors.indigo.soft = '#818CF8'
colors.cream = '#FAFAF7'
fontFamily.display = ['Space Grotesk', 'sans-serif']
fontFamily.sans = ['Inter', 'sans-serif']
fontFamily.mono = ['JetBrains Mono', 'monospace']
```

19. SEO & Metadata

Global metadata

- Site name: Aura Gen
- Default title template: "%s — Aura Gen"
- Default description: "Aura Gen is a South African data, AI and IT consulting partner. We help organisations turn complex data into smarter decisions and measurable business impact."
- Open Graph image: 1200x630 dark image with the Aura Gen wordmark and tagline. Placeholder PNG referenced at /og-default.png.
- Favicon: gold dot mark on dark background at multiple sizes.
- Locale: en_ZA.

Per-page titles and descriptions

Home

Title: Aura Gen — Intelligent data. Measurable impact.

Description: A South African data, AI and IT consulting partner. We help organisations turn complex data into smarter decisions and measurable business impact.

About

Title: About Aura Gen

Description: We are a South African technology and consulting company specialising in data intelligence, AI, business intelligence and enterprise integration.

Services

Title: Services — Aura Gen

Description: Nine capabilities across data, AI, BI, integration, governance, IT strategy and specialist IT talent solutions.

Sectors

Title: Sectors — Aura Gen

Description: We work across the public, private and development sectors in South Africa.

Contact

Title: Contact — Aura Gen

Description: Tell us what you are trying to solve. We respond within one business day.

Technical SEO

- Generate a sitemap.xml automatically (use the Next.js sitemap convention).
- Generate robots.txt allowing all crawling.
- Use semantic HTML — one h1 per page, h2 for section headings, h3 for subsections.
- Add JSON-LD structured data of type "Organization" on the home page with name, url, logo, sameAs (LinkedIn), and contactPoint.

20. Accessibility Requirements

- Target WCAG 2.2 AA conformance.
- Color contrast: minimum 4.5:1 for body text, 3:1 for large text. Verify gold-on-dark and ink-on-cream combinations.
- Every interactive element must have a visible focus state — never remove outlines without providing a replacement.
- All images require descriptive alt text. Decorative graphics use alt="".
- Form fields use semantic `<label>` elements bound to inputs.
- Validation errors are announced to screen readers via `aria-live="polite"`.
- The site must be fully operable with a keyboard, including the mobile menu.
- Use semantic landmarks: header, nav, main, footer.
- Respect `prefers-reduced-motion` in all animation code.
- Skip-to-content link at the top of every page for screen reader users.

21. Performance Targets

- Lighthouse Performance ≥ 90 on desktop and mobile.
- Largest Contentful Paint $< 2.5s$ on a simulated 4G mobile connection.
- Cumulative Layout Shift < 0.05 .
- Total page weight < 1 MB for the home page (excluding fonts).
- Defer all non-critical JavaScript.
- Use Next.js `<Image>` for all imagery, with explicit width and height.
- Preload only the two primary font weights (Space Grotesk 600 and Inter 400). Load others on demand.
- No third-party scripts in v1 except Plausible analytics.

22. File & Folder Structure

Recommended structure for a Next.js App Router project:

```
/app
  layout.tsx
  page.tsx          # Home
  /about/page.tsx
  /services/page.tsx
  /sectors/page.tsx
  /contact/page.tsx
  /insights/page.tsx # stub
  /careers/page.tsx  # stub
  /privacy/page.tsx  # stub
  /terms/page.tsx    # stub
  /api/contact/route.ts
/components
  /layout    # NavBar, Footer, CookieBanner
  /sections  # Hero, ServiceGrid, SectorGrid, etc.
  /ui        # Button, Card, Input, etc.
/lib
  copy.ts    # centralised copy content
  services.ts # service data array
  sectors.ts # sector data array
/public
  /images
  og-default.png
  favicon.svg
/styles
  globals.css
tailwind.config.ts
tsconfig.json
```

23. Build Instructions for Claude Code

Recommended sequence. Build in this order so each step has the foundation it needs.

Step 1 — Project scaffold

Create a new Next.js 14 project with TypeScript, Tailwind, and the App Router. Install lucide-react, framer-motion, react-hook-form, zod, and shadcn/ui.

Step 2 — Design tokens

Add the color, font and spacing tokens from sections 05–07 into tailwind.config.ts. Set up Google Fonts via next/font in the root layout.

Step 3 — Centralised content

Create /lib/copy.ts, /lib/services.ts and /lib/sectors.ts. Move all copy from this spec into these files so that all page components consume from a single source. This makes future copy edits trivial.

Step 4 — Global layout

Build the NavBar, Footer and CookieBanner in /components/layout. Wire them into app/layout.tsx.

Step 5 — UI primitives

Build the Button, Card, Input, Select, Textarea and Checkbox components in /components/ui using the design system.

Step 6 — Section components

Build re-usable section components: Hero, ServiceGrid, SectorGrid, PromiseSection, CtaBanner. Each takes its content as props sourced from /lib.

Step 7 — Pages

Build the Home, About, Services, Sectors and Contact pages in that order, composing the section components and pulling copy from /lib. Stub the Insights, Careers, Privacy and Terms pages with a single h1 and a short paragraph.

Step 8 — Contact form

Implement the contact form with react-hook-form and zod. Wire it to /api/contact, which can be a placeholder returning a 200 for now.

Step 9 — Motion and polish

Add the scroll-in animations, hover states and the nav scroll behaviour described in section 16. Respect prefers-reduced-motion.

Step 10 — Metadata, sitemap, robots

Add per-page metadata exports from each page file, generate a sitemap and robots.txt, and add the JSON-LD Organization snippet on the home page.

Step 11 — Accessibility and performance pass

Run Lighthouse and axe. Fix any contrast failures, missing labels and focus state issues. Confirm targets in sections 20 and 21 are met.

Step 12 — Final review

Read every page top to bottom against this spec and confirm the acceptance checklist on the next page.

24. Acceptance Checklist

The build is considered done when every item below is true.

Structure

- All five primary pages exist and are linked from the navigation.
- All nine service anchors work from the home page service cards and from the footer.
- All three sector anchors work from the home page sector cards.
- Insights, Careers, Privacy and Terms stubs exist and are linked from the footer.

Design

- All colors, font families, and spacing values match the tokens in sections 05–07.
- Hero radial glows are present and subtle on the home page.
- Buttons, cards, navigation and footer match the component specs in section 08.
- Mobile, tablet and desktop layouts all work per section 17.

Content

- Every paragraph, heading, eyebrow and label matches the copy in sections 10–14.
- Mission, Vision and the six Core Values appear on the About page exactly as written.
- All nine services are present on the Services page with the correct headings and copy.

Functional

- Contact form validates all required fields and shows clear errors.
- Contact form submits to `/api/contact` and shows the success state on a 200 response.
- Cookie banner appears on first visit and stores the decision in `localStorage`.
- Navigation behaves correctly on scroll (transparent → solid).
- Mobile menu opens and closes and traps focus correctly.

Quality

- Lighthouse: Performance ≥ 90 , Accessibility ≥ 95 , SEO ≥ 95 , Best Practices ≥ 95 .
- No console errors on any page.
- All images have meaningful alt text or empty alt for decoration.
- `prefers-reduced-motion` disables non-essential animation.

— END OF SPECIFICATION —
